

We are a dynamic and ambitious team of creative minds in the field of IT Security who have turned their hobby into a profession. We help our customers – who range from innovative start-ups to DAX-listed corporations – to master the challenges of IT Security. We offer exciting tasks and interesting projects to those who are passionate about new technologies and who enjoy getting to the bottom of complex issues.

Join our team! We are interested in hiring you asap as an:

Automotive IT Security Consultant (m/f/d)

Your tasks

Your work as an IT Security Consultant includes:

- ▶ Identification and risk assessment of security vulnerabilities using methods such as penetration testing and reverse engineering, in particular, with regard to automotive systems
- ▶ Implementation of realistic attack scenarios with rest bus simulation or in vehicles
- ▶ Individualized consultation with our customers on IT Security topics ranging from security architecture to organizational processes
- ▶ Presentation of results to customers as well as consultation regarding improvement measures

Depending on the extent of your previous knowledge, your experienced and specialized colleagues will introduce you to the various assessment methods and approaches. At the same time you will complete Offensive Security Certified Professional (OSCP) training.

Your profile

You are interested in IT Security; you follow the latest developments in automotive security and don't just associate CANoe with your next paddle trip. If you have these traits, along with fundamental values like reliability and honesty, we'll be well suited to each other. You also have:

- ▶ a degree from a university or technical university in informatics or electrical engineering, or comparable training and/or practical experience
- ▶ solid knowledge of IT security and experience with automotive technologies (e.g. bus systems, architectures, OS)
- ▶ analytical thinking, dedication, and the ability to rapidly and independently familiarize yourself with new topics
- ▶ professionalism and good communication skills
- ▶ very good ability to communicate in German and English (spoken and written)

Other good reasons for working with us, besides great colleagues, a flexible working environment and plenty of creative freedom, are described in detail on our website.
